

Dear Educator:

Welcome to the **Safety Sleuth Program and Student Project**. This program is designed for grades 1-4, is fully funded by PSEG Long Island and free to educators and students.

The Safety Sleuth program offers two grade appropriate options of two lessons (multiple activities within each) and a culminating student project. This project offers an opportunity to have students share what they have learned, and teachers can use this as an assessment tool. Students will be thrilled to become "CERTIFIED SAFETY SLEUTHS". These lessons are cross-curricular and can be effectively used in Science, Social Studies, ELA and other classes.

We are excited to work with you and your students. They will learn about being safe in many settings.

This packet includes:

- One Teacher Guide
- One sample Student Guide for you
- A class set of Student Guides
- A class set of Parent Letters to be sent home with your students

All program resources are available on our program site at: <http://safetysleuthprogram.com/>

### Student Project:

Students will create a final project that expresses their learning from the Safety Sleuth Program. Once the projects are completed, you will choose five (5) projects to submit to PSEG Long Island for a chance to be included in an island-wide, digital exhibition.

If you have any questions, please call or email me. I look forward to speaking with you and helping to **EM-Power** your students to become **Safety Sleuths**!

Regards,

*Colleen McKean*
